

Panel Discussion A - Panelist

Ms. Rebecca Smith
Senior Energy Policy Analyst
Oregon Department of Energy

Rebecca Smith is a Senior Energy Policy Analyst at the Oregon Department of Energy, where she focuses on alternative transportation fuels in the medium- and heavy-duty vehicle sectors, including electricity and renewable hydrogen. She is the lead author for ODOE's study on renewable hydrogen for Oregon, as required by SB 333 (2021). Previously at ODOE, she focused on electricity sector decarbonization, serving as the program administrator for the Oregon Renewable Portfolio Standard and the chair of the Portfolio Options Committee, an advisory body to the Oregon Public Utility Commission for the state's voluntary renewable power programs. Prior to joining ODOE, Ms. Smith worked on greenhouse gas mitigation policy and corporate climate risk management at organizations including Earth Advantage Institute, Det Norske Veritas, and EcoSecurities. She has an M.P.A in environmental science and policy from Columbia University and a B.A. from Grinnell College.
